

Make Internet Explorer 7 Your Default Web Browser.

You can set Internet Explorer as your default browser within Internet Explorer 7 or via the Control Panel in Windows XP. The choice is yours.

Set Internet Explorer 7 as your default browser via the browser

Open Internet Explorer 7.

Click on Tools then Internet Options from the Internet Explorer 7 toolbar.

Click on the Programs tab within the Internet Options window.

Click on the Make default button within the Default web browser section of the Programs tab.

Place a checkmark next to the Tell me if Internet Explorer is not the default web browser text if you want to be notified that another browser has been set as your default browser.

Click OK to save your changes.

Set Internet Explorer 7 as your default browser via the Control Panel in Windows XP

Click the Start button in the lower left of your screen.

Open your Control Panel.

Click on Internet Options.

Click on the Programs tab within the Internet Properties window.

Click on the Make default button within the Default web browser section of the Programs tab.

Place a checkmark next to the Tell me if Internet Explorer is not the default web browser text if you want to be notified that another browser has been set as your default browser.

Click OK to save your changes.
